In the event of a stroke, time equals brain cell death, yet most people do not take action with symptoms of stroke. Stroke is largely preventable but it requires an understanding of risk factors and changing behavior.

You can take action against brain attack by attending our free community seminar and educating yourself about the signs and symptoms.

**Presented by Dr. Phaniraj Iyengar**
Dr. Iyengar is Board Certified in Neurology and Vascular Neurology and is Medical Director of the Stroke Program at Sunrise Hospital and Medical Center

**THURSDAY, JULY 20**
